

The award winning online map service for professionals

## Access the widest range of mapping and geo-data products online.

- » Mapping, data and reports available from all major UK suppliers
- » Search and view detailed and up to date mapping and imagery
- » Flexible site selection and online GIS functionality
- » Multiple formats, application ready data
- » Data management console for collaborative working and cost management
- » Simple licence management and maintenance

“ emapsite is a great service that provides us with the data we need on ERM projects. But it is their knowledge of our sector, helpful advice and willingness to go that extra mile that sets them apart, especially when we have to deliver to tight deadlines and have very specific data requirements. ”

Kate Murray  
Principal Consultant (GIS), ERM
