

Better reports and data for site investigation

## GroundSure MapInsight

- » Comprehensive historic Ordnance Survey archive – 1840s to current day available
- » Clearer mapping (508 dpi) and use of colours
- » Better edge matching, fewer holes and blank sheets
- » Logical sequence and timeline

## Groundsure EnviroInsight

- » All industry reliable sources e.g EA, BGS, Coal Authority, PointX
- » Report includes imagery plus new sources of current industrial landuse data
- » Hazards and data mapped individually
- » Easier to analyse and interpret
- » Flexible options to support specific use

## GroundSure GeoInsight

- » More geology mapped than before
- » New geo-hazards mapped e.g. compressible deposits
- » Unique GroundSure historic landuse

## Subtechnics Utility Report

- » Comprehensive and reliable search
- » Detailed report maps and aggregates your search results
- » Available to download in 5-20 days
- » Reduces your risk on projects
- » Saves time and increases productivity on projects

“ emapsite delivers us all the information we need in a clear and concise format. Speed of service and the well presented layout of the reports help increase our productivity on Phase 1 desk studies. ”

Robert Hodges, Director, Crossfield Consulting Ltd

## more data, less risk
